

# Beamer Template with Custom Styling

TeXstudio Team (Enhanced)

# First Content Frame Title

---

This is some sample text on the black background.

- ▶ Item 1 will be in white.
- ▶ Item 2 as well.

The golden line should appear below the title.

# Another Frame with a Longer Title

---

More content goes here.

1. Numbered item A.
2. Numbered item B.

The title positioning and line should be consistent.

# Highlighting Key Information

---

On this slide, we will demonstrate how to make certain words stand out. You can use **red characters** for emphasis on specific terms like **important**.

For a stronger visual cue, you can place keywords within a **red block**. Notice that the text color inside the red block will be your default text color ('mywhite'), which provides good contrast. For example, this is a **critical point**.

You can combine these techniques:

- ▶ Emphasize a **single word** with color.
- ▶ Highlight a **short phrase** using a block.
- ▶ You can even put **bold text in a block**.
- ▶ Or have a **bold red word**.

This frame intentionally has no `\frametitle`. Therefore, no title or golden line should appear at the top. Only the main content with white text on a black background.

# Figure and Text Side-by-Side

---

This is where your descriptive text will go. You can use standard LaTeX formatting here.

- ▶ Explain key aspects of the figure.
- ▶ Provide supporting details.
- ▶ Or list important takeaways.

More text can follow here, describing the content further.
